

Numeracy Home Learning – November 2021

Task 1	Task 2	Task 3
<p style="text-align: center;"><u>Simple Sequences</u></p> <p>We have been thinking about different ways we can move during gym. Can you make a list of movements you could do at home? Running, jumping, leaping, hopping, walking toe to toe, skipping. These can help us develop our balance but also our coordination and focus. Can you jump 1 time, then hop 2 times, then jump 1 time? Can you add on any other movements? You could also draw out hopscotch and practice saying the numbers out loud as you land.</p>	<p style="text-align: center;"><u>Number Formation</u></p> <p>We have begun learning about the numbers to 10. Can you try to practise forming your numbers?</p> <p>You can try using a pencil or a pen and paper. You could also try writing your numbers in the air using a finger or use Play-Doh, shaving foam, cooked spaghetti or chalk/crayons.</p> <p>Once finished, check to see if all the numbers are facing the correct way.</p>	<p style="text-align: center;"><u>Board Games & Card Games</u></p> <p>Playing card games and board games gives us an opportunity to practise focusing and to improve our counting. Do you have a board game that you can play with someone at home? If not you could print the attached game of snakes and ladders. You can also access a free online dice or a dice app to play with too.</p>
<p style="text-align: center;"><u>Months of the Year</u></p> <p>We have been learning the months of the year at school. Practise saying the months of the year in the correct order. Can you remember which month your birthday is in? Maybe you can find out what month somebody at home's birthday is? You could also practise saying the months of the year in order. You can find some 'Jack Hartman' songs on youtube to help you learn the Days of the Week and the Months of the Year.</p>	<p style="text-align: center;"><u>Shape Hunt</u></p> <p>We have begun learning about basic 2d shapes. Can you go on a shape scavenger hunt around your house? Try to find as many examples of different shapes as you can. Where can you see different shapes in your house? Maybe you could look out for shapes in books or on TV too? You could also draw a picture and see how many different shapes you can include or you could draw a shape and then see what you can turn it into. For example, a circle might become a face or a football.</p>	<p style="text-align: center;">Online learning & websites</p> <p>Topmarks counting game https://www.topmarks.co.uk/learning-to-count/underwater-counting</p> <p>Doorway online number formation https://www.doorwayonline.org.uk/number/upto10/</p> <p>ABCYa numerical order game https://www.abcya.com/games/numerical_order</p> <p>Counting to 10 song https://www.youtube.com/watch?v=pzmB0GoEKkA</p> <p>Months of the year song https://www.youtube.com/watch?v=bp4365To218</p> <p>Days of the week song https://www.youtube.com/watch?v=zJRlo89q9Qo</p>
